

## PLAY14 (Art.310 - Art.311)

ELECTRONIC SCOREBOARD for CARAMBOL, SNOOKER, POOL, DARTS, etc.

### PLAY14 (Art. 310)

- Special research and development have gone into the creation of this scoreboard, a useful device designed for billiard-type games (carambol, snooker, pool, etc.) and darts. The PLAY 14 scoreboard can also be used for many other games.
- The display (numbers) is 11.5cm high and can be read from a distance of 30m. The colours utilized --red and green-- make the display both attractive and easier to read. Three displays for each player: two showing 3 numbers and one showing a single figure. In addition, indication is given of the player currently involved in the game.
- Controlled at a distance by means of a sturdy **flat-membrane keyboard** already hooked up to a cable 18m in length.
- It makes available a number of practical functions pertinent to the game in progress (e.g., POINT AVERAGE, MAX. POINT TOTAL, etc.).
- If the electrical power should fail, no points total in the memory bank will be lost (and this without the use of batteries).
- The scoreboard comes equipped with adhesive- backed tags printed in several languages, tags which explain the display functions (SCORE, SET, FRAME, GAMES, INNINGS, BREAK, PUNKTE, SATZ, SPIELE, AUFNAHME, PUNTI, PARTITE, RIPRESE). Also included are 4 white plastic blanks upon which the name of the players or team can be written; these blanks are located right under the display terminal itself.
- A sturdy metal box easily attachable to a wall.
- Size: 1pz 75x59x10cm + 1pz 22x12x1,7cm. - Weight: 12.2kg.
- Power Supply: 230V 50-60Hz, 60VA. Available also for 115V.

Item codes and prices (not including VAT)

Art.310

**...PLAY14 with wired remote control by 18m long cable**

Size: 1pz 75x59x10cm + 1pz 22x12x1,7cm. - Weight: 12.2kg.

Art.311

**...PLAY14 with infrared remote control**

Size: 1pz 75x59x10cm + 1pz 5,5x14,5x2,2cm. - Weight: 10.6kg.

### PLAY14 with Infrared Remote Control (without remote keyboard) (Art. 311)

- The same as the above model but with an **infrared remote control** in place of the keyboard.
- Telecontrol. Range: 15 m. Sturdy small aluminum box. Membrane keyboard which does not get ruined by dirt or liquids.
