

TIME-OUT Signaller (art.254)

Acoustic buzzer and light signaller for requesting Time-Out in volley-ball.

- Built-in operation button.
- A remote control button can be connected via the proper connector.
- Light signaller with bright LEDs. Once operation begins, the light blinks for 18 seconds. The length of time can easily be regulated from 5 to 90 seconds.
- Acoustic signaling via two buzzers (sound intensity of 105db/30cm each). The buzzer sound lasts 1.5 seconds or as long as the operation button is held down.
- Handle for easy manual lifting and display of signaller. The handle can be easily removed if you wish to secure the signaller to a fixed support.
- Power supply: via 2 common, readily available, alkaline 6LR61 9V batteries (included). Battery life is approximately 1,600 operations (several years): hence, there is no need to worry about recharging or procuring an electrical power supply. When a battery is low the brightness of the signaller will gradually decrease, allowing enough time for adequate battery replacement.
- Size and weight (includes handle): 25 x 7 x 7cm. , 0.45kg.

Item codes and prices (not including VAT)

Art.254 **EUR 173.00**
TIME-OUT Signaller with handle for manual lifting
Size: 27x7x7cm. - Weight: 0,45kg.
