

## COIN-TIMER (Art.200)

TIMER FOR COINS

**For the time operating of: videogames, lights for tennis courts, internet terminals, electronic scoreboards for darts, showers, aspirators, solariums, etc..**

- The COIN TIMER, can be used in many sectors where the using time of goods or services has to be paid by inserting coins or tokens. It can be used, for example, to turn on the night lights of a tennis court or for an electronic scoreboard for darts, for the operating of videogames by time, for internet terminals, showers, solariums, etc..
- According to the value of the money that has been inserted and the hourly tariff that has been programmed, the corresponding time will be automatically loaded. The maximum cumulative time is 9 hours and 59 minutes. You can arrange, if you wish, up to 3 different hourly rates that will automatically alternate on different time zones that can be programmed for the duration of a day or a week.
- The COIN TIMER supplies 2 electrical contacts: one for service (SERVICE) to which the load to be controlled must be connected and a signalling one (ALARM) to which it is possible to connect a light that will remain alight during the last minute of the purchased time. Moreover an acoustic signal indicates when 2 minutes and 1 minute is left before the time is over.
- The general totalizer of the takings and the individual meter for coins ensure the maximum operating reliability, also without electricity. The visualizer has its own internal lithium battery that ensures complete operation for more than 7 years if it is not connected to the electrical supply.
- Sturdy metal container that can be fixed to a wall.
- The device does not fulfill the Italian obligation of electronic recording and data transmission (Art. 2, comma 2, D.Lgs. Italiano 127/2015).
- Power supply: 230Vac, 50-60Hz, 250mA MAX - Available also for 115Vac.  
(selectable during purchase)
- Maximum load applicable to the SERVICE and ALARM contacts: 5A, 250 Vac.

Item codes and prices (not including VAT)
